## ▶ Gynecomastia / Man boobs Niche Website

Google loves relevance and if you can show that your an authority within a specific niche, you'll find the site will rank better. (*Authority is a combination of backlinks & topical relevance*). Building a website based around the sub-niche of Gynecomastia and having a wide range of content on this subject is a great way of promoting Gynextrex

## ▶ Fitness Website

Gynecomastia can be the result of fat build up in the breast tissue or hormone imbalance. This makes it a perfect product and sub-niche to promote on a fitness focused website.

If you have content based around steroids, it can also compliment that. Its known that steroids can cause gynecomastia.

What makes Gynetrex different? Below are some of the USP's, these will help you to write your product reviews.

- ▶ Unique 3-step system reduces enlarged male breasts
- ▶ Boost fat loss with a powerful, all-natural, fat-burning supplement
- ▶ Burn excess chest fat with workout and nutrition plans created by experts
- ▶ Build, sculpt and define your pecs with targeted chest workouts
- ▶ Easy to follow system reduces chest fat and improves the appearance of your chest

Gynetrex is formulated with natural ingredients, that have been shown to be effective at burning fat. This helps to reduce man boobs and the build-up of fatty tissues in the chest area.

## ► **Garcinia Cambogia**

Garcinia Cambogia is a very well-known ingredient when it comes to helping with weight loss.

It helps your body to create glycogen, which helps to burn fat but also helps to fuel your muscles. Giving you more energy and speeding up the recovery time from your workouts.

Many people have also noticed reduced appetite, helping them to consume fewer calories.

## ► **Bitter Orange**

Bitter Orange is a great ingredient as it helps to reduce the amount of fat that your body stores. Not only that but it also helps with thermogenesis, resulting in your body burning more fat.

## ▶ Guarana

Guarana is a source of caffeine, which has been proven again and again to help with fat burning. It helps to burn more fat to produce energy, so you'll also find you have that energy boost for your workouts.

## ▶ Griffonia

Griffonia simplicifolia is a Griffonia seed extract that's rich in 5-hydroxytryptophan (5-HTP).

This natural substance is believed to promote weight loss by increasing serotonin levels. Serotonin is a "happy" hormone that helps regulate mood, appetite and sleep.

When serotonin levels are low, people may feel more motivated to eat, especially foods high in carbohydrates or sugar.

Griffonia may help to increase serotonin levels, leading to reduced food cravings and weight loss.

To help you write content on Gynetrex, I've included some of the most common questions customers ask below;

## ▶ How do I use the Gynetrex supplement?

Take 3 capsules with water 20 minutes before your first meal of the day, every day.

## ▶ How long does each bottle of the Gynetrex supplement last?

Each bottle of Gynetrex contains 30 servings (90 capsules), which will last you one month.

## ▶ Is Gynetrex safe?

Yes. The Gynetrex supplement is completely safe with no known side effects reported. That's because we use only 100% natural ingredients that have been thoroughly researched, tested and proven to be safe and effective.

## ► Why can't I just take a pill to get rid of my man boobs like other products?

There is no pill that will magically get rid of your breasts. Spot reduction of fat in specific areas (like your chest) is simply not possible. But when used alongside a consistent diet and exercise program, a good supplement can help speed up the fat-burning process considerably, helping you reduce your overall body fat which in turn, will reduce the size of your breasts.

This is why, unlike other products, Gynetrex is a complete, comprehensive system that combines solid exercise and nutrition plans with a powerful fat-burning supplement to get you the results you want. In fact, it's the only complete system available that combines exercise, nutrition and supplementation to successfully get rid of enlarged male breasts.

## ► Will the results be permanent?

Provided you maintain a sensible diet and exercise regimen, your breasts should not return. Getting rid of your man boobs permanently means making permanent changes to the way you eat and exercise. Revert to old habits and you risk inviting your old problem back along with them. That's because fat cells are permanent and can always grow again. Which means that if you regain weight, it is possible that your breasts could start to grow again too.
